Welcome to Milan, Italy

We are glad to inform you that the XXXI International Conference on Neutrino Physics and Astrophysics (Neutrino 2024) will be held in the vibrant city of Milano, Italy, from Sunday, 16th June 2024 to Saturday, 22nd June 2024.

Milano, a city celebrated for its scientific, technological and cultural contributions, provides an inspiring backdrop for the gathering of minds, highlighting the profound connection between this cosmopolitan center and the study of natural sciences.

Milano has been intricately linked with cutting-edge neutrino physics research through projects such as CUORE and Borexino. The Cryogenic Underground Observatory for Rare Events (CUORE) aims to search for a rare nuclear decay process and uncover the nature of neutrinos.

This groundbreaking project owes much to the visionary work of Prof. Ettore Fiorini and his group at Università di Milano - Bicocca, which have a leading role in the development of cryogenic detectors for neutrino physics.

The Borexino experiment utilized neutrinos as probes to delve into the properties of the Sun. The pioneering work of Prof. Gianpaolo Bellini and his group at Università di Milano in the development of ultra-pure detectors has been instrumental in Borexino's quest to study low-energy solar neutrinos with unprecedented precision.

In closing, we extend a warm invitation to our sponsors to join us in Milano for Neutrino 2024. We believe your presence will greatly enrich the conference experience. We look forward to sharing the excitement of neutrino physics advancements with you.

UNIVERSITÀ DEGLI STUDI MILANO - BICOCCA Piazza dell' Ateneo Nuovo, 1

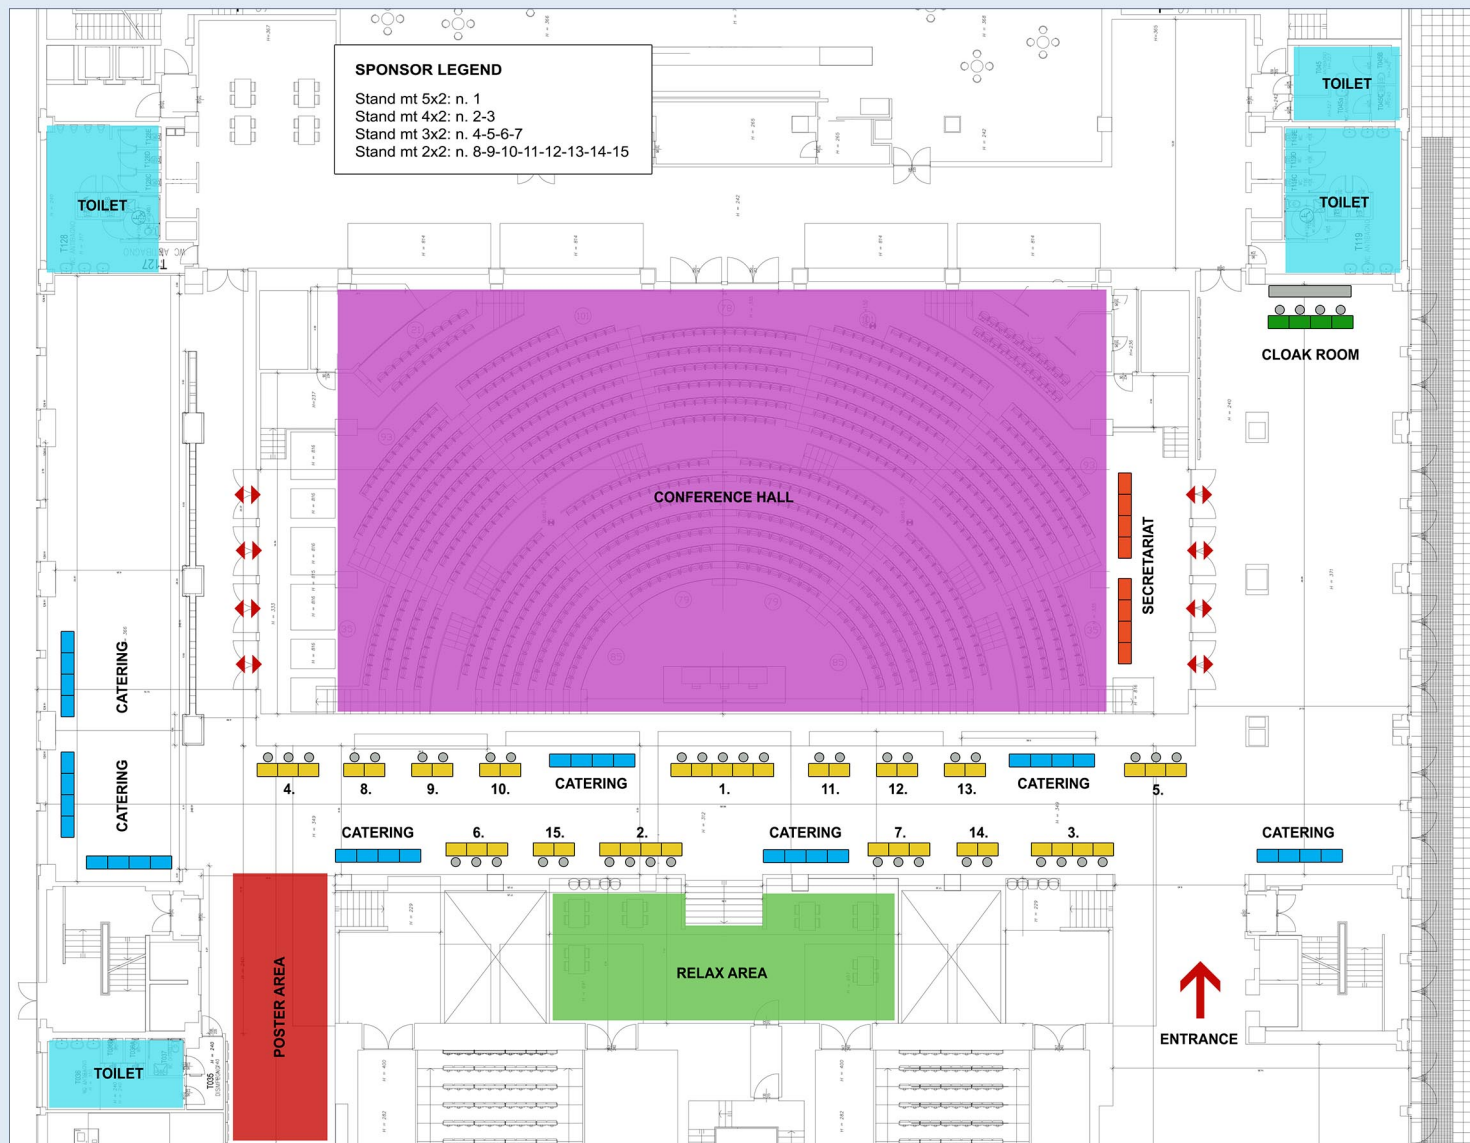

In the late 1980s, the academic bodies of the University of Milan set out a programme designed to aimed at obtaining new locations for innovative research activities in strategic sectors and extend teaching offerings to disciplinary areas absent at that time in the local public institution. In September 1993, the Milan City Council determined that the Bicocca area would be the site of Milan's new university hub. On June 10, 1998, the second University of Milan was established by Ministerial Decree. The Bicocca campus is located in the Milan neighborhood of the same name, once home to large industrial companies such as Pirelli and Breda. The new university became part of a large-scale redevelopment project launched around 1986 and coordinated by the architect Vittorio Gregotti.

UNIVERSITÀ DEGLI STUDI DI MILANO Via Festa del Perdono, 7

Also known as 'La Statale', the University of Milan is a relatively young university on the national scene. It was founded in 1924 thanks to the tenacious efforts of Luigi Mangiagalli, a physician and gynecologist, who thus realized his long-nurtured dream of an athenaeum for the Lombard capital. Always characterized by a multidisciplinary and innovative educational proposal with an eye toward the new professionalism required by a rapidly changing world of work, the University has also strengthened over time its efforts on the front of technology transfer and application development of the results of scientific research in the economic-productive context.
