

XXXI International Conference on Neutrino Physics and Astrophysics

Milano (Italy) - June 16-22, 2024

Dear all,

The organization of the XXXI International Conference on Neutrino Physics and Astrophysics in Milan is underway. Please note that

**Abstract submission for posters is open until March 9**

We encourage you to submit your proposals as soon as you are ready, without waiting for the deadline; this will greatly help us to speed up the selection process.

We also encourage you to register as soon as possible on our website: <https://neutrino2024.org/registration/>. If you do so before March 31, you can take advantage of the reduced early registration fee. After March 31, you will be able to register at the regular rate until May 15, but no additional applications will be accepted after that date.

We recommend that you plan your trip to Milan and book your accommodation well in advance: Milan is a busy city and last-minute reservations should be avoided.

The conference is planned as a full face-to-face event, marking the return to its traditional format after the end of the COVID 19 pandemic. Please note that no remote connection will be foreseen during the sessions; instead, the full recording of the talks, as well as slides and posters, will be available Open Access on Zenodo shortly after the end of the conference.

In addition, we would like to encourage collaborations, researchers, and research groups who are planning to publish new data in the coming months to consider using Neutrino 2024 to present their novel results.

XXXI International Conference on Neutrino Physics and Astrophysics  
*Milano (Italy) - June 16-22, 2024*

**If you are in such a position, please contact us in the coming weeks**

New and interesting results can be the subject of invited plenary talks: NEUTRINO 2024 will indeed retain the characteristics of a conference based solely and exclusively on invited plenary talks, plus 2 dedicated poster sessions, where many other specific points can be learned and discussed.

That's all for now.

Best regards,

Chiara Brofferio and Gioacchino Ranucci (co-chairs)
